Renewal Lift

Save A/B

Customers First

30 → 10 mins

Admin Time Per Contract

Renewals are predictable, Until they AREN'T

Expiring contracts sit in spreadsheets with no clear next action

Follow-ups get missed during busy weeks

Messaging is inconsistent across customers

Best customers churn quietly unless someone catches it early

Renewals depend on “one person who knows the system”

What makes it different? No “AI Chat”. A Real Workflow.

AI doesn't just answer questions—**it runs the process** (with approvals)

Built for **field service renewals**, not generic CRM sequences

Designed to work **upload-first** and later integrate with ERP/FSM tools

Start with Upload. Integrate when you are ready!

Most teams don't want an IT project. Start with CSV/Excel in days. If the results are strong, we integrate with your ERP/FSM/QuickBooks.

Other ERP/FSM tools

Works with your existing system. Integrate Later if you Love it.

A Renewal System your Office Team Can Run

Renewals Copilot AI turns your renewal season into a repeatable workflow: track every expiring contract, focus on the right customers, and send the right message at the right time—without full automation.

Never miss a renewal

Approve, don't write

Save your best customers first

Renew more service contracts, without chasing people in Excel.
